**Marquise Technologies to unveil R A I N, powered by NVIDIA Quadro Digital Video Pipeline at NAB 2010**

*Geneva, Switzerland* – Marquise Technologies announces today that R A I N, its new advanced color grading solution, powered by award winning NVIDIA Quadro Digital Video Pipeline will be introduced at this year NAB.

R A I N, Radically Advanced Imaging N-gine is a sophisticated color grading system designed for client supervised sessions. This is the ideal turn-key solution for grading commercials, music clips, or feature films in mixed workflows. Based on NVIDIA Quadro DVP technology, R A I N combines the velocity of a video system with the power of a computer-based grading solution.

- direct path from image capture, to process, to image out
- real-time image transport through 3G SDI
- stereoscopy in 4:4:4
- digital camera workflows (RED, ARRI) simple, fast & reliable
- remote control of slave devices like virtual telecines and VTR
- output on tape or disk
- expandable processing power
- support for Tangent Devices CP100, CP 200 and Wave control panels

Together with SONDOR, Marquise Technologies will showcase O C E A N, a universal telecine controller. Directly controlling the ALTRA 16/35mm SD/HD/2K telecine film transport and image sensor, O C E A N provides one light, best light and scene by scene transfers with automatic or manual scene detection, turning ALTRA Telecine into a complete grading suite.

An easy RED workflow (including r3d files conforming) will also be demonstrated using powerful playback and conforming solution M I S T. Decoding and processing data files (RED, ARRIRAW, DPX, TIFF, etc) M I S T also has strong conforming features (from EDL or Final Cut XML) and supports AAF, MXF, DNxHD or Apple ProRes standards.

With its primary grading and editing capabilities, M I S T is the ideal assistant station to prepare material before final process on a hero system.

### **About Marquise Technologies**

Marquise Technologies designs state-of-the-art solutions for the post-production and the television broadcast industry. Like precious jewels, every product released has been deeply thought, developed and manufactured with special care, for the full satisfaction of the customer. It is shaped through the ideas and vision of its designers and engineers who are united by a common goal and a common spirit: to build the excellence.

The company addresses post-production facilities and digital film labs, and provides them with high-end solutions for image processing, data conforming, color grading, restoration and finishing. For more information on Marquise Technologies, please visit the website [www.marquise-tech.com](http://www.marquise-tech.com).
