Marquise Technologies appoints Cintel srl as Official Reseller in Italy

Gland, Switzerland –Marquise Technologies, designer of high-end post-production solutions, has announced today that Cintel Cinema Television Equipement srl has been appointed official reseller in Italy for its full range of products.

The collaboration between Marquise Technologies and Cintel srl started a few months ago around the integration of O C E A N telecine controller, as Cintel srl is the historical partner of Cintel International for southern Europe sales.

“We are very proud to receive from Marquise Technologies the resellership of their products, because being in the telecine business for 26 years we were really aiming to have a way to revitalize the telecine suites with a new controller, adding expanded capabilities to work also with 2K files in a SAN environment and improving the telecine suite with extra features like advanced color grading and file conversions. Furthermore, Marquise Technologies is filling a gap of quality-price equipment in a changing post-production market” says Fabio Setti, Director of Cintel srl.

“We had the chance to work together with Cintel srl for the integration of O C E A N telecine controller in Italy. Cintel srl has a full understanding of its customers needs, not only regarding telecine but also the entire facility workflow, needs that our full range of products can cover, and it is very naturally that we are broadening our already fruitful cooperation” comments Laurence Stoll, CEO of Marquise Technologies.

Cintel srl is also the reseller for Sondor in Italy, another company partnering with Marquise Technologies for O C E A N controlling the ALTRA telecine. Cintel SRL is now able to provide its clients with the entire range of Marquise Technologies products: O C E A N telecine controller for Sondor and Cintel machines, R A I N the advanced color grading suite and M I S T, the DI deck.

###

About Marquise Technologies
